

EXATIG

Convert your MMA DC generator into a functional HF TIG generator !

www.gys.fr

Mini high frequency (HF) generator

- HF starting for non-pulsed DC TIG welding
- Gas synchronisation
- 2T/4T torch trigger management

Optimised for EXAGON 400 CC / CV

- Quick connection (Plugged) with operation warning light
- Pre-gas and post-gas function
- Automatic detection of the torch
- TIG DC and TIG DC pulsed functions
- HF (without contact) or LIFT (with contact)

Portable and robust

- Reinforced bodywork
- Rubber pads
- Can be positioned on a trolley

Adjustable gas flow via a flowmeter

MMA welding can be done directly

by disconnecting the negative power cable and connecting the electrode holder to it

Made in France

A complete range of accessories

Power cable (10m)
ref. 032446

Trolley mounting 10 m³
ref.037779

Remote cable (11 m)
ref.036925

ref. 013780
