

Trimaco DIY

Easy Mask KleenEdge Painting Tape offers a specially formulated easy-peel adhesive applied along the edge, which eliminates the need for tape and also makes application quick and easy. The adhesive is designed not to leave a sticky residue, even when left in direct sunlight. With Easy Mask Self-Stick Masking Paper, sharp, clean edges are achieved because the adhesive applied to the paper's borders seals tightly to the surface, overcoming seepage and bleed-through. Available in sizes ranging from two, three, 3.75 and four inches to six, eight and 12 inches.

Fabriform Neken DIY

Business headed by Chris Windust has recently wholly acquired Fabriform Neken Ltd. The company was founded in 1959 by Geoffrey Kneen and managed for most of that time by his son, Paul Kneen. Mr Windust is joined by Stephen Walter in finance and Simeon Bromioni in sales.

The takeover coincides with a complete rebranding and relaunch of the range of polystyrene wall tiles, tile transfers, tile trims and accessories from the 'Neken' brand to 'Easy Tile'. Mr Windust said "we plan for this to mark a step change in the development of this well respected company and its superb range of products".

GYS DIY

French welding equipment and battery charger manufacturer GYS Ltd is exhibiting at Totally DIY for the first time this year. Products on show will include a wide range of welding machines aimed squarely at the UK DIY customer and well-priced products that ensure effective and trouble free welding from regular domestic 13A power supplies, as well as battery chargers, boosters and related accessories. Amongst the products on show will be Gysmi 195 PFC (Power Factor Correction), an MMA inverter-based welding machine with microprocessor control that is able to weld at 160Amps, enough to comfortably weld 4.0mm diameter basic or rutile electrodes, on a 13 Amp plug.

Polycell DIY

Polycell Damp Seal, 3-in-1 Mould Killer and Stain Stop are all now available in an easy-to-use sponge tube format. Designed to cover common wall and ceiling problems

www.polycell.co.uk

such as damp, stains or mould and algae, this new method allows accurate, one coat application. The sponge tube format is quicker and less messy to use than traditional brush or spray applicators, and provides a great add-on purchase for eradicating and preventing the return of common DIY problems. Rrp is £4.99 for 125ml 3-in-1 Mould Killer tube and £6.99 for both Damp Seal and Stain Stop 125ml tubes.

Bird Brand DIY

Bird Brand rejoins Totally DIY with its wood care products and DIY sundries. New to visitors will be Ecosote, an environmentally friendly wood preserver. Available in three colours, the four litre has a retail price of £7.99. It penetrates timber, is water repellent and claims to be the only (non-solvent based) HSE-approved preserver available in this price range. Also ready for the show, is the new 2010 catalogue.

Trimaco DIY

Trimaco's One Tuff Floor Protector consists of a durable fabric backed with a specially engineered coating that is designed not to delaminate. The cloth side absorbs paint and other liquids to prevent tracking, while the coated side provides slip resistance and maximum protection against leakage. No adhesive backing means the same One Tuff roll can be used on multiple types of flooring without change outs for each change in surface material. It is also reverse wound (coated side out) to achieve maximum ease of use. The floor roll is available in 24-inch and 48-inch widths as well as a variety of lengths.
